SUMMARY

Experienced Full Stack Developer with passion for creating attractive and interactive websites meeting customer needs. Excels in HTML, CSS, JavaScript and React development.

SKILLS

HTML	CSS	JavaScript	Tailwind CSS
React.Js	NextJs	NodeJs	Databases: MongoDB
Git/GitHub			

WORK EXPERIENCE

EnR Consultancy Services (November 2021 - February 2023)
Full Stack Developer

- Reviewed code, debugged problems and corrected issues.
- Many websites were developed, programmed, and maintained for clients with an admin dashboard, e-commerce, booking, payment integration with PayPal and Stripe, and multilingual support. It involves mostly front-end work.

EnR Consultancy Services (August 2021 - October 2021)
React Js Developer intern

- Quickly learned new skills and applied them to daily tasks, improving efficiency and productivity.
- I constructed four static websites for clients and used React.js, Tailwind CSS, and a Node.js backend to send email when forms were submitted.
- Proved successful working within tight deadlines and fast-paced atmosphere.

PROJECTS

Blog clone using NextJs
I used NextJs, Typescript, MongoDB, Tailwind CSS, and Next Auth to create this website. Users can use this to look up blog entries and filter their results by title or category. In the admin interface, which is used to manage blog entries, administrators can also add staff members.

HealthCare App using Python
For this app, I used QT5 for the front-end and SQLite as a database. It is developed to ease appointment and consultation process for patients and for doctors to check appointments easily. This app reduces the manual work required to maintain all records.
